EaSI TA Workshop

Digitalisation Strategy for Microfinance Institutions

This 1-day workshop, organised by the European Microfinance Network (EMN) in the framework of EaSI Technical Assistance, was proposed for selected Microfinance Institutions from Europe who are looking to embrace technology in order to address key strategic organisational challenges and opportunities.

At the core of the workshop stood the questions:

- *What is the strategic vision for your organisation?*
- *How is this vision supported or influenced by technology?*
- *How digital do you want to become?*

The latest digitalisation research from EMN and the Microfinance Centre (MFC) was shared and discussed and participants heard the first-hand digitalisation journeys and lessons learnt of specialists from [Qredits](#) and [microStart](#).

To find out more about the workshop contents, [please consult the agenda](#).
